

About Kangaroo

Kangaroos belong to the animal family

Macropodidae, which literally means 'big foot.'

Thanks to their large feet and powerful hind

legs, kangaroos can travel more than 56km/h

Kangaroos more than 9m in a single bound –

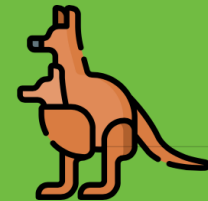

that's more than six ten-year-olds lying head to toe!

Fun Fact 1

Kangaroos are the only large animal to use hopping as their primary method of locomotion.

Fun Fact 2

Young kangaroos (joeys) will sometimes jump head first into their mother's pouch when frightened.

Places where we can find Kangaroos
